ABF4000 Auto Patty

Benefits

The ABF4000 auto patty machine is a variable speed model, controlled by a foot switch. Capable of forming 4000 patties per hour in various shapes including a custom design specified by the client. With a long standard conveyor of 450mm and a larger drum of 25Lt, the ABF4000 is truly an industrial mass production model suited to a production line environment

Features

- Variable Speed controlled by a foot switch
- 4000 patties per hour with single drum
- 8000 patties per hours with double drum
- No dismantling tools required
- Standard 450mm conveyor
- 3 Phase power
- Heavy duty frame
- Stainless steel paddle
